

INTEGRATED ENGINEERING SOLUTIONS FOR INDIAN RAILWAYS

Safety systems, utility solutions and precision-engineered
assemblies designed for railway operating conditions

Fire Safety System

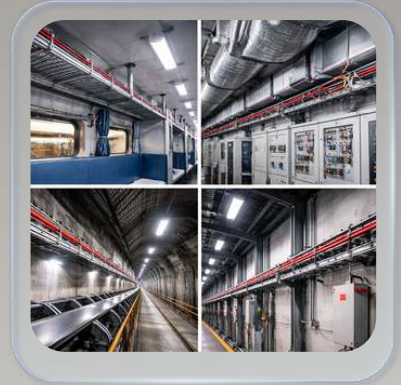

Fire detection, suppression and control for rolling stock

High Pressure Water Mist

Aerosol Fire Protection System

LHD based Fire Detection

Fire Control Panels
Reliable system intelligence

Fire Safety Doors
Designed to resist. Built to protect

Locomotive Electrical Panels

Reliable power distribution & control systems
for rail applications.

Passenger Coaches | Power Cars | Locomotives | Railway Yards

Waterless Toilet / Urinal Systems

Low-water, hygienic sanitation solutions for passenger coaches

Our Capabilities

- SS, MS, Brass & GI components
- CNC machining & sheet metal fabrication
- Electrical panel manufacturing
- Wiring, testing & system integration

Designed for vibration, heat and continuous operation.

PRECISION MANUFACTURING & SYSTEM INTEGRATION

We manufacture precision components and assemblies for railway safety, utility and electrical systems.

CNC Machined Metal Components

Electrical Panels & Enclosures

Fabricated & Assembled Sub-systems

Precision Brackets & Mounts
