

FIRE DETECTION & LIFE SAFETY SYSTEMS

Active & passive fire protection solutions for critical environments

Automatic Fire Detection & Suppression Systems

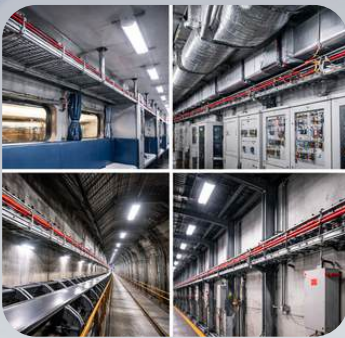

High Pressure Water Mist

ABC Powder System

Aerosol Fire Protection System

LHD based Fire Detection
Continuous thermal monitoring

Fire Control Panels
Reliable system intelligence

Fire Safety Doors
Designed to resist. Built to protect

Applications

Aerospace & Defence

Railways

Mining

Industrial Automation

Industrial Plants

Electrical Rooms

Hospitals

How the System Works

Early detection, intelligent decision-making and rapid suppression to prevent escalation of fire incidents.

Detection → Control Panel → Suppression / Isolation

- Detection Systems (LHD, Sensors)
- Suppression Systems (Water Mist, ABC, Aerosol)
- Passive Fire Protection (Fire Doors)
- Control & Monitoring Panels

Why Viba

- Designed for Indian operating conditions
- In-house design & manufacturing
- Mech + Electrical + Electronics expertise

Security Safety Systems

Anti-Theft Security Fogger System

Instant fog. Zero visibility for intruders.

Application

- Jewelry & gold shops
- ATMs and bank vaults
- Server rooms
- Warehouses & logistics hubs
- Retail showrooms
- Industrial storage spaces

Eco & Safety Info:

- Non-toxic, safe fog liquid
- Leaves no residue on surfaces
- Environmentally friendly materials
- Developed, manufactured, and tested in India
